

Expertise with Local Roots and National Reach**Greetings!****Sage Pro to Sage X3 Migration**

Over the past year we have been working on developing an inexpensive path to move you from your retired Sage Pro ERP system to Sage X3, the platform that we have found to be best transition.

Sage X3 retains all of the features and functionality of Sage Pro such as a focus on distribution, manufacturing industries, and source code availability, plus much, much more.

Because of our deep knowledge of both systems, we have created a path that delivers a fully functional hosted solution with **NO** up-front costs for implementation, data conversion and configuration.

[For details go to our web site and review the video and Sage X3 Product Tour.](#)

Sincerely,
WAC Solution Partners Team

**July**

Wisdom from Wiki

Benford's Law

We are starting a new column in our Newsline that highlights wisdom that can be found in Wikipedia.

For the first entry I have to thank Michael Ericksen for pointing out this mathematical anomaly several years ago.

Benford's Law, also known as the Law of First Digits or the Phenomenon of Significant Digits, is the finding that the first digits (or numerals to be exact) of the numbers found in series of records of the most varied sources do not display a uniform distribution, but rather are arranged in such a way that the digit "1" is the most frequent, followed by "2", "3", and so in a successively decreasing manner down to "9".

Integrator Introduction

This month we want to highlight eBridge Connections, longtime Sage integration partner providing eCommerce integrations into Sage ERP solutions as well as many other ERP platforms.

WAC has recently completed a project with eBridge to link a new Sage X3

system with multiple trading partners including Shopify, Amazon, Target, Walmart, Costco and others.

The integration includes sales orders, invoicing, ASN generation, inventory updates, etc. for a rapidly growing on line retailer.

Recently eBridge was acquired by Jitterbit, a leading API transformation company, that will allow eBridge to expand their traditional EDI solutions with API alternatives.
